

Self-Check Kiosk

The Self-Check unit features an ergonomic design suitable for both adults and children, multilingual support, and plug-and-play integration, enabling users to complete borrowing transactions independently before reaching the circulation desk.

With its UHF RFID technology, it can read multiple materials simultaneously. Advanced features such as automatic user identification, remote management, and fault notifications help streamline library operations and improve efficiency.

Ergonomic and user-friendly design

Multilingual support

Plug & Play integration

Multiple item reading (UHF RFID)

Automatic user identification

Technical Specifications

Protocol	ISO 18000-6C / EPC Class 1 Gen2
LLRP Support	Available
Operating Frequency	865–868 MHz
Connectivity	TCP/IP LAN Ethernet
Dimensions	43.07 × 25 × 16.70 cm

Environmental Conditions

Operating Temperature	-10°C to +50°C
Humidity	95% (maximum)

Display

Display Type	9" HD Touchscreen
